

Unique Technologies Shipping Policy

Domestic Shipments

The Unique Technologies preferred carrier is United Parcel Services (UPS) within the contiguous United States. UPS will not ship to P.O. Boxes. Daily pickup is available and unless otherwise requested all shipments are sent via UPS Ground.

Orders must be received before 1pm Eastern Standard Time(EST) to be considered for same day shipment given satisfaction of payments terms and product availability.

Unique Technologies requests that you provide your UPS account number so that all billing is charged to your account. If you are unable to provide a UPS account number for billing Unique Technologies will ship on your behalf and bill shipping charges according to a matrix based on service requested and volume of product.

Drop-Ship Service:

If you would like Unique to ship your order directly to your customer simply select drop-shipment and include the appropriate address in the shipping address field. Unique will include a standard packing list along with the shipment and you will need to invoice the customer separately. Please include special instructions in 'Order Notes'. Unique's invoice to you will include a five dollar handling fee for providing this service.

International Shipments

Unique Technologies welcomes international customers to ship with UPS or their preferred carrier on their own account. Other carriers are available, but do not have regular daily pick-ups.
