

## Unique Technologies Shipping Policy

### Domestic Shipments

The Unique Technologies preferred carrier is United Parcel Services (UPS) within the contiguous United States. UPS will not ship to PO Boxes. We have a daily UPS and FedEx Ground pickup. Unless requested, all shipments are sent via UPS Ground.

Orders should be received before 2 p.m. Eastern Standard Time (EST) to be considered for same day shipment given satisfaction of payments terms and product availability.

Unique Technologies requests that you provide your courier service account number so that all billing is charged to your account. If you are unable to provide a courier account number for billing, we will ship on your behalf and bill shipping charges according to a matrix based on service requested and volume of product.

### Drop-Ship Service

If you would like Unique to ship your order directly to your customer, simply select "drop-shipment" and include the appropriate address in the shipping address field. Unique will include a standard packing list along with the shipment. You may provide your own packing list; however, please email that to us immediately after placing your online order. You will need to invoice the customer separately. Please include special instructions in 'Order Notes'. Your invoice will include a five dollar (\$5) handling fee for providing this service.

### International Shipments

Unique Technologies welcomes international customers to ship with UPS or their preferred carrier on their own account. Other carriers are available, but do not have regular daily pick-ups.
